EDUCATION

Master of Science, Computer Science | University of Florida | Gainesville, FL | GPA: 3.5/4.0 Dec 2024

- **Relevant coursework:** Advanced Data Structures, Analysis of Algorithms, Software Engineering, Human Computer Interaction, Distributed Operating Systems, Computer Networks, Computer Information Security.

Bachelor of Technology, Computer Science | Bennett University | Delhi, India | GPA: 3.5/4.0 May 2023

WORK EXPERIENCE

Software Engineer | Falcon Technologies | Remote, United States Dec 2025 – Present

- Architected 15+ RESTful API endpoints in Node.js/Express with async non-blocking middleware pipeline, reducing average API response time by ~25% through query optimization and eliminating redundant DB roundtrips.
- Designed a custom middleware pipeline enforcing authentication, input validation, and rate-limiting across all API routes, reducing unauthorized request failures by ~30% and improving backend fault tolerance.

Software Development Engineer | Greenstand | Remote, United States Jan 2025 – Dec 2025

- Optimized database query performance by implementing composite indexes on frequently queried columns reducing wallet transaction retrieval API response time from **850ms to 320ms** through query analysis and **EXPLAIN** plan optimization.
- Standardized REST API contract design for 10+ wallet endpoints, enforcing strict request/response schemas that cut integration turnaround by ~25% and eliminated data inconsistencies in digital tree token transaction tracking.
- Architected backend service modules for QR-based token transfer flows in TypeScript, reducing business logic duplication by ~30% across 8 wallet routes and improving maintainability.

Software Developer Intern | Superstars, Inc. | Remote, United States Aug 2024 – Dec 2024

- Developed **10+ responsive front-end components** for the web application with Angular, HTML, CSS, and TypeScript, ensuring seamless integration with the backend through comprehensive API testing of **14+ endpoints** with Postman.
- Collaborated in agile development environment with a cross-functional team of 5 members, participating in weekly sprint planning sessions, driving 3 major product improvements that increased **user engagement by 18%**.
- Built 6 reusable video components using MediaRecorder API deployed across 12+ pages, reducing code duplication by 30%, and integrating AWS CloudFront for edge-cached delivery that cut average video load latency by ~35%.

Cloud Engineer Intern | Mactores | Remote, India Mar 2022 – Jun 2022

- Optimized client **AWS costs by 20%** through right-sizing analysis and resource recommendations across 3 accounts.
- Implemented environment-specific deployment logic in GitHub Actions for serverless automation of **AWS Lambda** functions, reducing **deployment errors by 25%**.
- Configured **CloudWatch** dashboards and alerting pipelines across 2 AWS-migrated applications, improving automated incident detection and reducing mean time to detect failures by ~40%.

VOLUNTEER EXPERIENCE

Software Developer | Twilight (University Startup) | [Website](#) Sept 2024 – Jan 2025

- Built interactive Angular website with dynamic UI components and implemented a hybrid MySQL-MongoDB architecture.
- Implemented Redis pub-sub architecture to trigger Brevo email workflows on signups, cutting **notification delay by 40%**.

TECHNICAL SKILLS

Languages: C++, Python, Java, TypeScript, JavaScript, Go, Bash

Web Technologies: HTML5, CSS3, Angular, React.js, Next.js, Redux, Node.js, Express.js

Databases: MySQL, PostgreSQL (SQL), MongoDB, Redis (NoSQL)

Cloud & DevOps: AWS (RDS, S3, EC2, Lambda, CloudFront), Microsoft Azure, Git, Docker, Kubernetes, Jenkins, CI/CD

AI & Development tools: Machine Learning, GitHub Copilot, Copilot Studio, Cursor, Prompt Engineering, Multi-Agent Systems

Certifications: AWS Certified Cloud Practitioner, Microsoft Certified Azure Administrator Associate (AZ-104)

PROJECTS

GatorHive | React.js, Node.js, AWS RDS, MySQL, AWS S3, AWS EC2, Git

- Developed a responsive web application with **React.js** to simplify event discovery and promotion for UF students.
- Built Node.js/Express backend with **MySQL** on **AWS RDS**, implementing connection pooling for efficient resource management and **AWS S3** for optimized upload and retrieval processes.
- Deployed it on **AWS EC2** infrastructure via **PM2** to ensure scalability and high availability for the users.

SmartBank AI | Agentic AI, GenAI, React, Node.js, Express.js, MSSQL, AWS S3, Git

- Architected **multi-agent AI** system with inter-agent communication using **Azure OpenAI** and **Copilot Studio**, implementing 5 autonomous agents with coordinated workflows and advanced prompt engineering.
- Developed banking intelligence web application that uses multi-agent, featuring real-time market dashboards, customer analysis pages, and interactive chatbot using **React**, **Node.js**, **REST APIs**, and **Azure SQL database**.

ACHIEVEMENTS

- Secured a scholarship of \$8000 for my master's program, in recognition of exceptional academic performance.
- One of the 11 students out of 500+ applicants to receive a US\$17000 Scholarship for bachelor's degree.
